

# Amateur radio, a resource for research and education

Björn Pehrson, bifrost seminar 2012-03-08

- Frequencies LF, MF, HF, VHF, UHF, EHF, SHF (1kW with a few exceptions)
- Repeaters
- Digipeaters
- APRN 44/8
- Donated antennas (Kvarnberget, TM, Sk0mt, sk0bu)
- ECHOLINK, IRPL, APRS networks
- Radios

# Rigs, antennas and schack

# Embedded radios

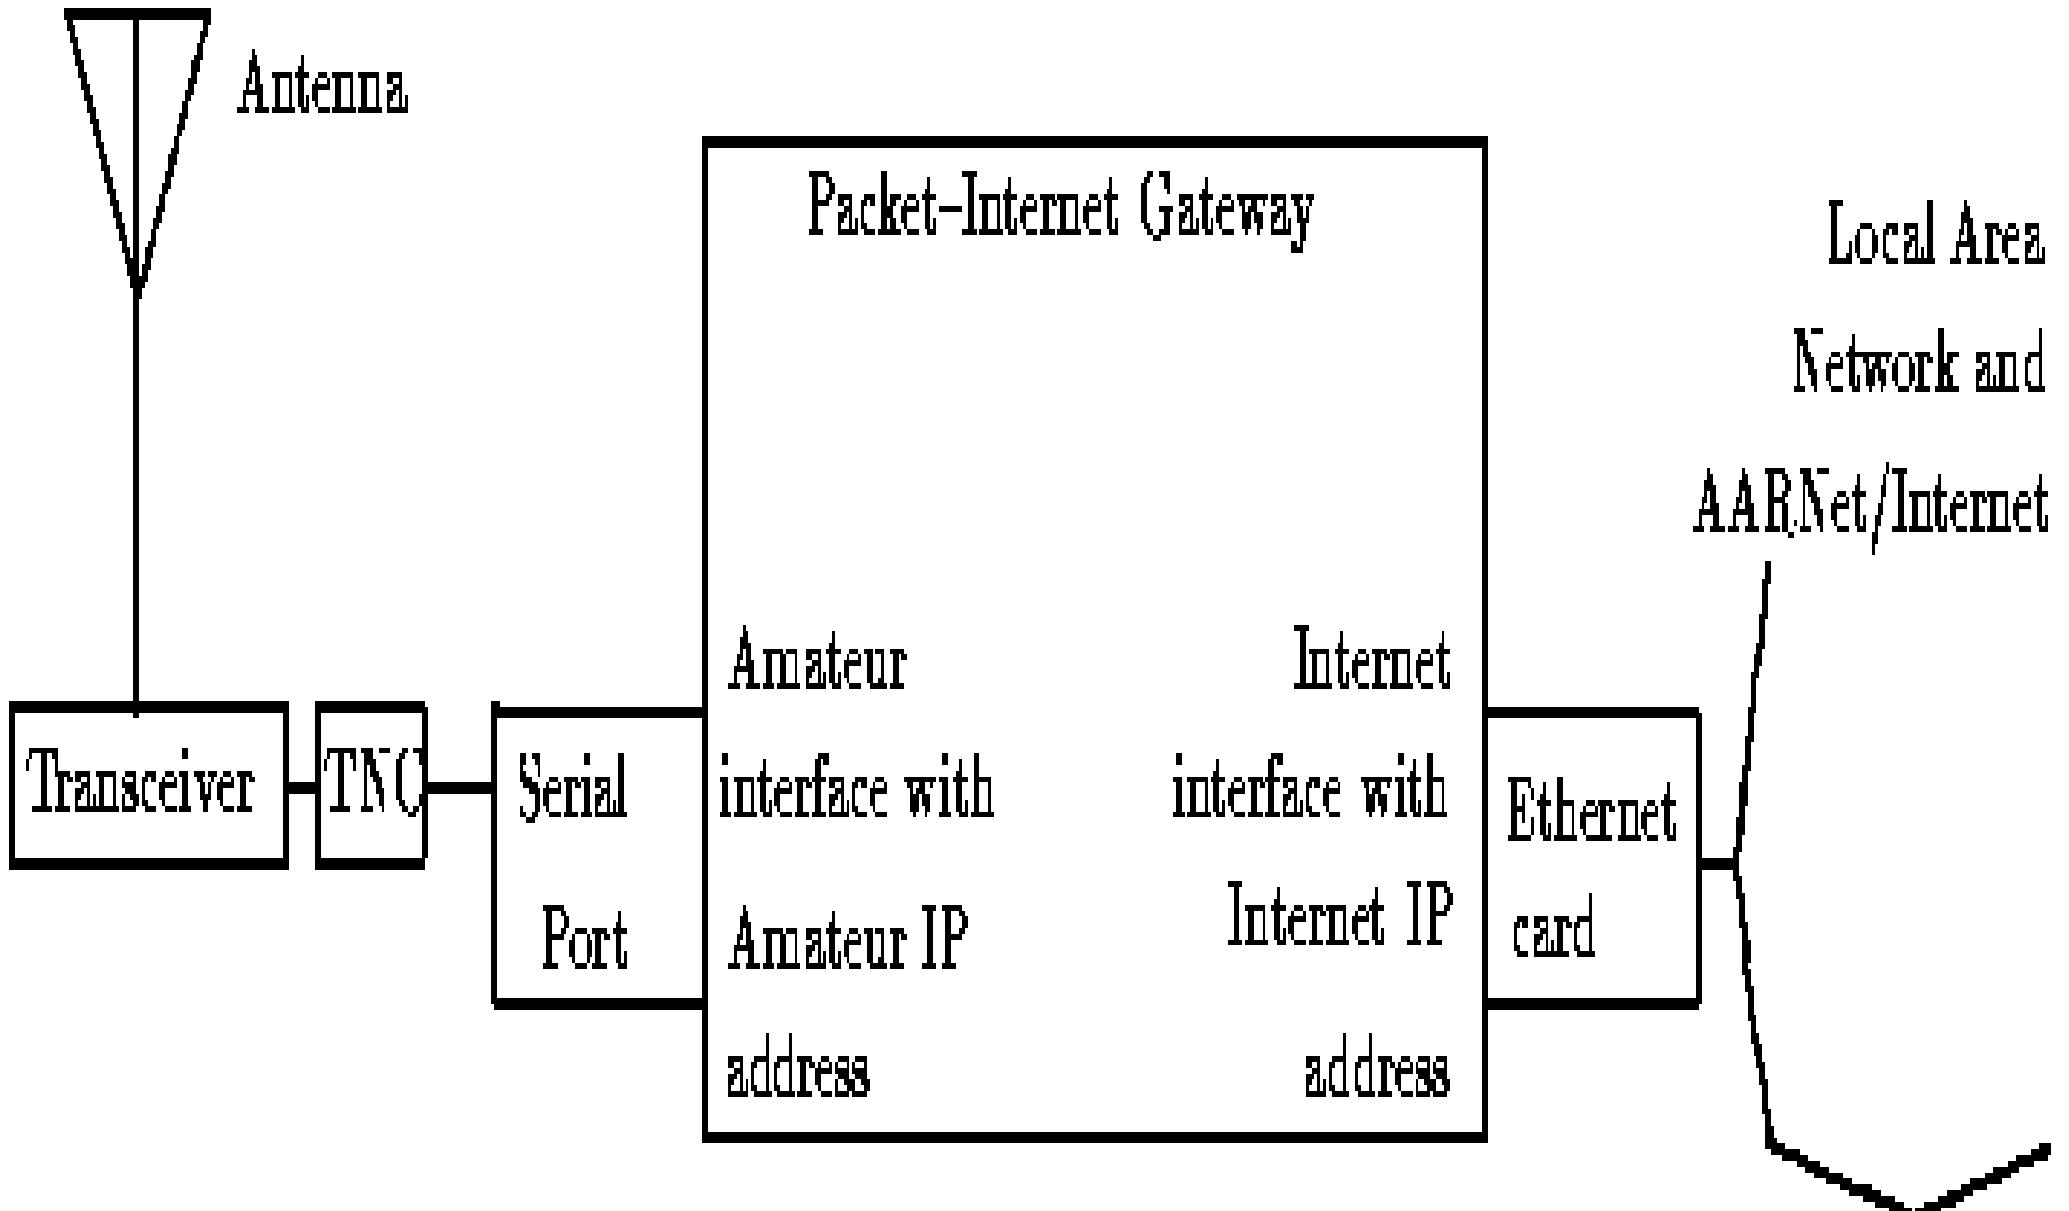

- ATMega128RF 2.4GHz
- Radiometrix
  - BiM 433MHz 10mW
  - tx/rx 145 MHz 0,3, 0,5, 2W
- SDR
  - Funcube dongle 64MHz – 1700 MHz
  - websdr

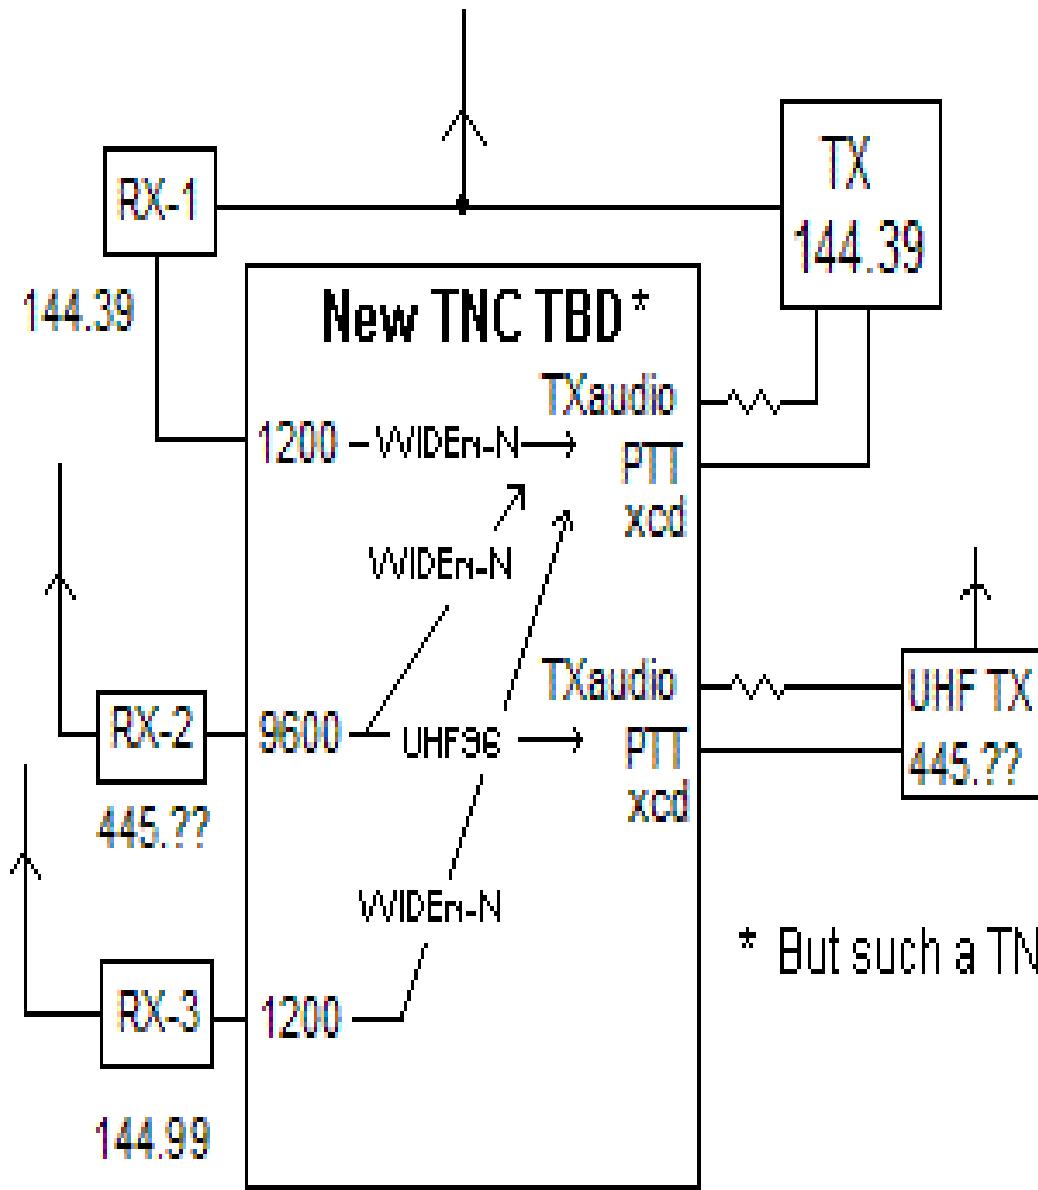

# Traffic modes

- Analog modes:
  - CW, SSB, AM,(W/N)FM, IRPL, Echolink ([www.echolink.org](http://www.echolink.org))
- Digital modes
  - Evolution: RTTY, Packet Radio, Protocol architecture
  - Apps: Chat, BBS, APRS ([www.aprs.org](http://www.aprs.org), [aprs.fi](http://aprs.fi), [www.aprs-is.net](http://www.aprs-is.net), [aprswxnet](http://aprswxnet), balloon)
  - Transport/Network: TCP/IP, APMRNET ([www.apmr.org](http://www.apmr.org)), 44/8 HSMM/Hinternet ([en.wikipedia.org/wiki/Hinternet](https://en.wikipedia.org/wiki/Hinternet))
  - Links: serial, tor-protocols ([wb8nut.com/digital](http://wb8nut.com/digital)), ax25 ([www.tapr.org/pub\\_ax25.html](http://www.tapr.org/pub_ax25.html)), D-star,....
- Network elements:
  - Repeaters/Digipeaters/routers
  - Trackers, (opentracker, trackuino), sensor networks

# Amateur Radio Gateway

# APRS

## The Ultimate APRS Digipeater

- \* Un-congested inputs on UHF 9600 baud
- \* Un-congested inputs on 144.39 +600 (if avail)
- \* Traveler inputs on 144.39

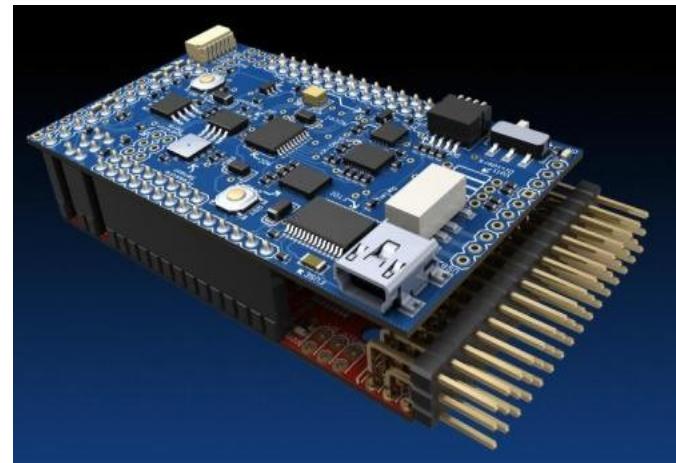

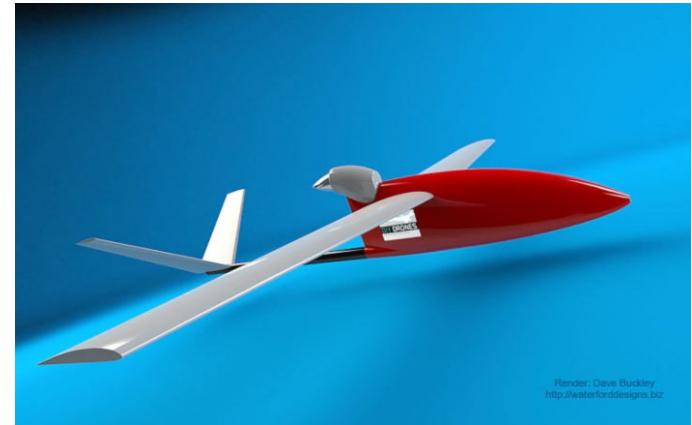

All WIDEn-N digipeated OUTPUT on 144.39  
Specialized UHF96 data stays on UHF

\* But such a TNC does not yet exist

# The amazing flight of K6RPT-11

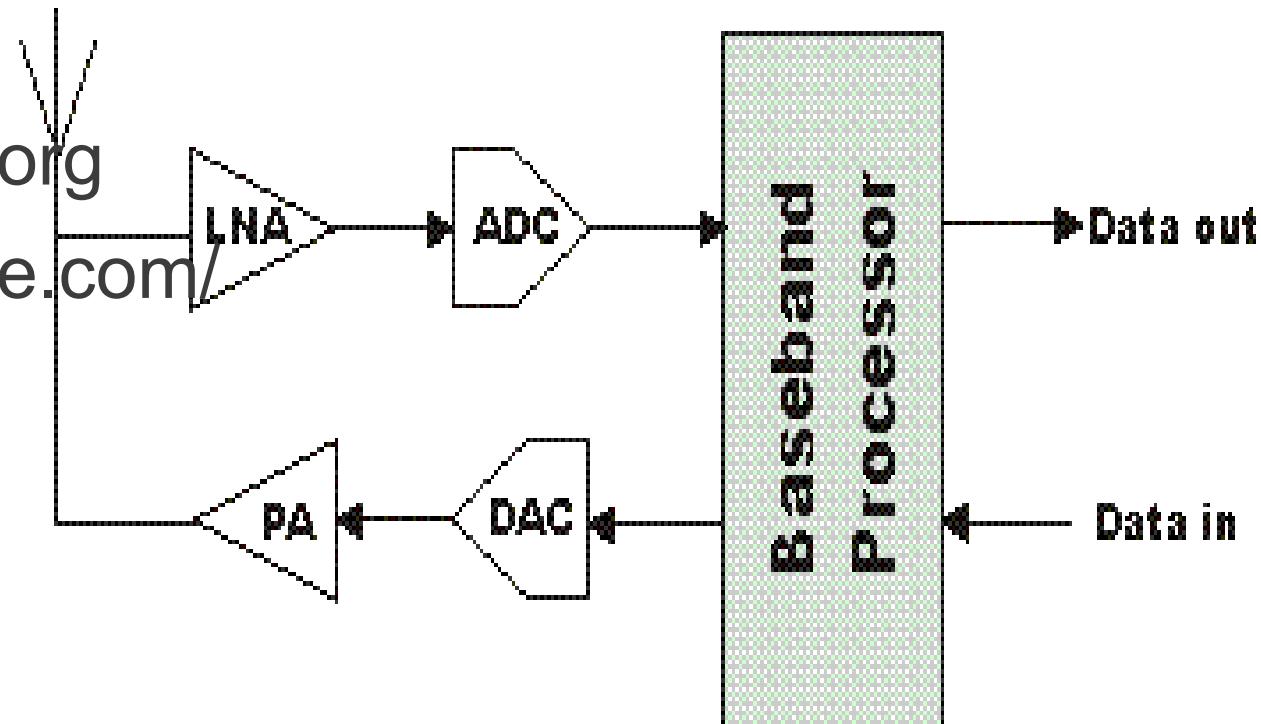

- Drones

# Software Defined Radions

- Gnuradio blocks
  - filters, channel codes, synchronisation elements
  - equalizers
  - modulators, demodulators, vocoders, decoders
- Hardware
  - [www.softrockradio.org](http://www.softrockradio.org)
  - [www.funcubedongle.com](http://www.funcubedongle.com)
  - [www.websdr.org](http://www.websdr.org)

# Motivations

- Connect environment sensor networks in remote rural areas to the global environment data network
- Exploring an innovative HF radio link protocol as an alternative to AX25
