Introduction

12.4

10.   Nature of Defect: (complete, concise explanation of the perceived problem)

The Introduction wrongly states that Annex B is an integral part of this Recommendation | International Standard

CommonResults is defined as set type and can therefore not be included in a sequence type by use of the COMPONENT OF. An alternative sequence type should be defined.

11.   Solution Proposed by the Source: (optional)

In the Introduction, change from:

     Annex B, which is an integral part of this Recommendation | International Standard, ..

to:

     Annex B, which is not an integral part of this Recommendation | International Standard, ..

```
CommonResultsSeq ::= SEQUENCE {
      securityParameters    [30]  SecurityParameters                     OPTIONAL,
      performer             [29]  DistinguishedName                      OPTIONAL,
      aliasDereferenced     [28]  BOOLEAN                                DEFAULT FALSE,
      notification          [27]  SEQUENCE SIZE (1 .. MAX) OF Attribute  OPTIONAL }
```

> NOTE – **CommonResults** and **CommonResultsSeq** consist of the same components. The former is used when included in set types by the **COMPONENT OF** type, while the latter is used similarly in sequenced types.

In the **AbandonResult**, **AddEntryResult**, **RemoveEntryResult**, **ModifyEntryResult** and **ModifyDNResult** change **CommonResults** to **CommonResultsSeq**

12.   Editor's Response:
