DEFECT REPORT FORM

1. Defect Report Number: **254**

    Title: **chainingRequired** component misplaced

2. Source: CEN/ISSS/WS-DIR

3. Addressed to: ISO/IEC JTC1/SC6 and ITU-T SG 7

    Editor Group on the Directory

4. (a) WG Secretariat: UK (BSI)
    (b) ITU-T WP: WP 4

5. Date Circulated by WG Secretariat:

6. Deadline for Response from Editor:

7. Defect Report Concerning: FDAM 1 to ITU-T Rec. X.518 (1997) | ISO/IEC 9594-4 : 1998

8. Qualifier: (e.g.: error, omission, clarification required)

Errors

9. References in Document: (e.g.: page, clause/section, figure, and/or table numbers)

10.4 and 10.8 and Annex

10. Nature of Defect: (complete, concise explanation of the perceived problem)

A **chainingRequired** component has been added to the **CrossReference** data type. This is redundant as the accessPoint component already includes the required information.

FDAM adds **chainingRequired** to the **AccessPoint** data type. It is context specific tag 4. However, the **AccessPoint** data type is included multiple places where context specific tag 4 is also used. In addition, the **chainingRequired** component has no particular meaning in all these cases. The **chainingRequired** component should therefor be moved to the **MasterOrShadowAccessPoint** data type with a safe tag.

11. Solution Proposed by the Source: (optional)

Remove the **chainingRequired** component from **CrossReference**

Remove the **chainingRequired** component from the **AccessPoint** data type and add it to the **MasterOrShadowAccessPoint** data type with context specific tag 4.

The **chainingRequired** component indicates whether chaining is required for that DSA, i.e. a referral shall not be returned for that DSA.

12.   <u>Editor's Response</u>:

(any material proposed for processing as an erratum to, an amendment to, or a commentary

on the IS or DIS final text/ITU Recommendation or Draft Recommendation is attached

separately to this completed report).
